

Features

- ◆ Welds in Less Than 1/2 Second
- ◆ Bond Strength Equals UV
- ◆ Bond Strength Exceeds Solvents
- ◆ Lure Length Reduced by 50%
- ◆ No Wicking
- ◆ Hermetically Sealed Welds
- ◆ Minimal Thermal and Mechanical Stress
- ◆ No Particulates

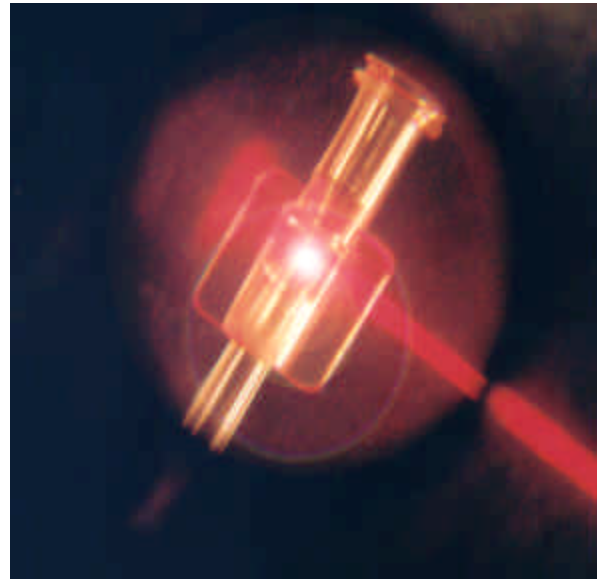

Applications

- ◆ High Pressure Tubing
- ◆ Intravenous Therapy Tubing
- ◆ Hemodialysis Tubing
- ◆ Cardiovascular Tubing
- ◆ Insulin Delivery Tubing
- ◆ Neonatal Drug Delivery Systems
- ◆ Catheterization
- ◆ Angioplasty Applications

Natvar's Sure Bond Laser Weld Tubing is available in PVC, TPU, TPE and COPE along with other materials upon request. All materials are USP Class VI approved and gamma and ETO stable where applicable.

All tubing is custom produced to individual specifications for size, ID tolerance, concentricity and roundness.

Natvar's Sure Bond Tubing is custom produced to meet individual customer specifications and specialized requirements for the medical marketplace. Natvar utilizes total quality manufacturing (TQM) to insure the highest quality, process control and cost effectiveness available. Natvar's Sure Bond Tubing is produced in a clean environment under strict GMP compliance. All raw materials are FDA sanctioned and certified.

Advantages of Laser Welding

- ◆ No Chemicals Needed
- ◆ Eliminates Chemical Waste and Emissions
- ◆ Eliminates Quality Failures from Leaking
- ◆ Eliminates ID Occlusions from Chemicals
- ◆ Reduce Material in Lures
- ◆ Increased Cycle Time on Assembly
